Unbeatable offers for migrating Windows Server and SQL Server to the cloud

Microsoft

While innovation has supplanted cost savings as the primary driver of cloud migration for many businesses, moving to the cloud needs to make sense for your bottom line.

AWS is **5x** more expensive than Windows Server and SQL Server*

> … Using Azure Hybrid Benefit, we'll be able to reduce our overall costs by up to 82%.
>
> **Jeff Brady**, Senior Programme Manager, Allscripts

Unbeatable offers

The lowest cost of ownership by combining unique pricing options and extended security updates

Free extended security updates for Windows Server 2008 and Windows Server 2008 R2

A recent Microsoft study found that enterprise customers considering cloud migration for Windows Server were

30%

more likely to choose Azure due to its intelligent security, seamless hybrid capabilities, and **unique cost savings options.**

*Prices are as of 24 October, 2018 and subject to change. Actual regional pricing and program discounts may apply. Actual savings may vary based on region, instance size, and performance tier. Savings exclude Software Assurance costs, which may vary based on Volume Licensing agreement. Contact your sales representative for more information.
